journal of MEMBRANE SCIENCE

Subject Index

Adsorptive fouling, 79
Amino acids, 171
Apparent radius, 143
Asymmetric electrolytes, 107

Biological membrane, 207
Bipolar and biological membranes, 185
Bipolar membrane, 269

Cake formation, 57
Carbon dioxide, 161
Carrier-mediated, 161
Ceramic membrane, 121
Charged membrane, 143, 269
Citric acid separation, 201
Conducting polymer, 89
Contact angle, 79
Cross-flow microfiltration, 57
Current efficiency, 177

Dense polymer films, 245
DFCM, 185
Diffusion, 15
Diluent molecular weight, 219
Distribution of fixed charges, 177
Dual-mode sorption model, 279
Dynamic filtration, 121

Electric double layer, 107
Electrodialysis, 201
Endothelial matrix, 207
Evaporative casting, 245

Facilitated transport, 231
Flux limit models, 129
Fouling, 121, 207

Gas and vapor permeation, 15
Gaseous system, 161
Gas separations, 15
Gas solubility, 279
Gelation, 129

HEMA-MMA hydrogel, 257
Hollow fiber, 25
HPLC, 143
Hydrogen separation, 97

Immobilized enzymes, 1
Impedance, 185
Inorganic membrane, 97
Ion-exchange membranes, 177
Ionic strength, 143
Ion-pairing transport, 231
Ion-penetrable membrane, 107
Ion separation, 269

Kinetics, 1

Lactate extraction, 231
Limiting current, 201
Liquid membranes, 231
Liquid membrane stability, 231

Mass transfer coefficient, 129
Melt spinning, 25
Membrane material, 79
Membrane preparation and structure, 245
Microcapsule, 257
Microfiltration, 121
Microporous membranes, 25
Model, 57
Modeling, 1
Molecular imprinting, 171
Molecular recognition, 171

Nanofiltration, 269
Non-isothermal membrane transport, 161
Nonuniform fixed charge distribution, 107
Nylon 12, 219

Optical resolution, 171
Osmotic pressure, 129

Palladium acetate, 97
Palladium impregnated alumina membrane, 97
PEG, 219
Permeability, 257

Pervaporation, 89
Plasticization, 279
Poly(4-vinylpyridine), 37
Poly(alkyl methacrylates), 279
Polyolefins, 37
Polypropylene, 25
Polypyrrole, 89
Polysulfone membranes, 1
Poly(vinyl pyrrolidone), 257
Pore-grafted microfiltration membranes, 37
Pore modification, 97
Protein, 143
Pulsed-field gradient NMR, 71

Quasi-elastic neutron scattering, 71

Retention, 143
Reverse osmosis, 37, 269

Salt-promoted interaction, 143
Self-diffusion, 71
Shear induced diffusion, 57
Silica, 71
Site-directed modification of enzyme, 1
Skin, 245
Sol–gel method, 97
Structure, 219
Surface diffusion, 97

Template, 171
Theory, 245
Thermal energy, 161
Thermally-induced phase separation, 25, 219
Thermodynamic properties, 107
Transport number, 177
Tubular membrane, 57

Ultrafiltration, 207
Ultrafiltration membranes, 129
UV-grafting, 37

Zeta potential, 143
